GUIDED INSTRUCTION IN THE ANCIENT ART OF TRANSFORMATION

Materials included with the modules consist of proprietary texts, manuals, color drawings, audio tapes, dictionary, laboratory equipment, glassware, chemicals, and planetary herbs.

Also included in your registration is free consultation with your own personal instructor, who will answer any questions, grade your tests, and provide feedback on your progress. Your instructor will be your private guide to the deeper truths of alchemy.

Tuition for the course depends on the extent of training you plan to pursue and is explained on the Application Form. To enroll, simply fill out the Application Form and return it. Your personal instructor will then send you your materials. There is no time limit for completing the modules.

CERTIFICATION

Certificates of expertise will be issued in Herbal and Spiritual Alchemy. The *Master Alchemist Diploma* will be issued on completion of the seventh module and the submission of a dissertation on the alchemy subject of your choice. You can then become a paid alchemy instructor at Flamel College for students in your area.

ALCHEMY

*A series of home study
courses in the ancient
art of transformation
from Flamel College*

Module 1: Alchemistic Philosophy

From its birth in the ancient land of Egypt to its rebirth in modern quantum mechanics, alchemistic philosophy is presented from both theoretical and historical viewpoints thus providing a solid grounding for later work.

Module 2: Practical Laboratory Alchemy

The seven fundamental operations are presented in laboratory demonstrations. All the labware for experimental work in the methods of Calcination, Dissolution, Separation, Conjunction, Fermentation, Distillation, and Coagulation is included.

Module 3: Spagyrics - Signatures and Healing

Spagyrics is a way of separating and preserving the hidden qualities (signatures) of plants and minerals in elixirs, tinctures, and powders. The results are subtle yet powerful medicines free of the impurities normally associated with their gross material forms.

Module 4: The Metals and Their Correspondences

By actually working with the metals, the alchemist gains an intuitive understanding of their profound signatures. In that way, the archetypal or universal correspondences are more easily grasped. These correspondences exist simultaneously on all of the physical, psychological, and spiritual levels of reality. Samples of each of the seven metals are included, as well as experiments and meditations revealing their properties.

Module 5: Spiritual Alchemy and Perfection of the Soul

When practiced on the higher spiritual level, alchemy is a powerful force for the evolution of soul, which is the expression of the First Matter in us. By working in the inner laboratory of the mind, initiates learn alchemistic meditation and work with the Three Essentials to achieve actual transmutation.

Module 6: Using Alchemy in Everyday Life

Alchemy is the study of the forces of creation in the macrocosm of the universe. Once these principles are mastered, the individual (or microcosm) can utilize these same forces to transform and enhance his or her own life.

Module 7: Master Alchemist Instructor Certification

Satisfactory completion of all previous modules is required before beginning the Master Alchemist Certification program. The secret of the First Matter is revealed in this section, and the adept will learn how to accumulate and manipulate this chaotic energy to attempt to change lead into gold.

The Master of Alchemy tries to perfect the world using the secrets of nature, and one of the best ways to accomplish that is to share the secrets of conscious participation in matter with others. For that reason, the emphasis in the final part of this module is in training others in the Great Work.

Persons who complete the seventh module are required to write a dissertation on an alchemy topic of their choosing. Acceptable dissertations will be published by ETX. The adept then is granted a Diploma In Alchemy and certified to be a teacher in the subject. Graduates are qualified to conduct alchemy seminars and personal consultations, and support local students taking the home study courses. Instructors receive up to \$200 per student enrolled. Payments for lectures and seminars can range up to \$2,000 per event. Additional income is available from personal consultations, selling tinctures and elixirs, and workshops.
